ACTIVITY REPORT

APRIL 2018

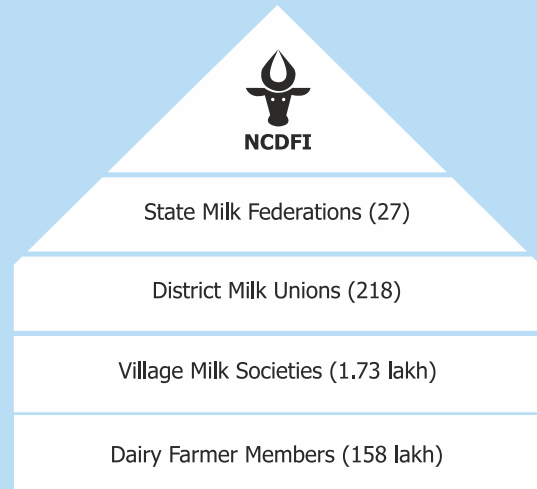

About us

National Cooperative Dairy Federation of India Limited (NCDFI), established in 1970, is an apex body of dairy/oil cooperatives. Its members include federal dairy cooperatives of states / union territories and National Dairy Development Board (NDDB) as its institutional member.

The primary objective of NCDFI is to facilitate the working of dairy cooperatives through coordination, networking and advocacy.

Major activities of the NCDFI are: Coordination of milk and milk product supplies to Defence Services; Providing Online Marketplace for Dairy Industry; and working for genetic improvement of cattle.

Total business transacted by the NCDFI during 2017-18 was ₹ 2,057 crores.

Adoption of technology and its application to ensure better returns to dairy cooperatives and in turn to milk producers has been the primary focus of NCDFI. One such initiative is NCDFI eMarket which was launched on June 10, 2015.

NCDFI eMarket facilitates the bulk sales of dairy commodities and procurement of required Raw/Packing/Chemicals for Dairy / Cattle Feed Plants. This platform ensures transparent, fair, economic and faster dealings for all the members.

NCDEX e-Markets Ltd (NeML) provides technical & business development support to NCDFI eMarket.

Message

National Dairy
Development Board

Dilip Rath
Chairman
NDDB

“

Fair and transparent mechanisms are key to ensuring that producers get remunerative price for their produce. At the village level, fairness and transparency in case of producer owned institutions is being ensured by having milk collection systems that accurately measure quantity and quality as well as linking quality to the price paid for the milk. Such fair and transparent systems have been a major reason for millions of producers to repose their trust in producer owned institutions.

In case of bulk sales and purchase transactions, our dairy cooperatives have largely relied on traditional tendering systems to ensure transparency.

With the rapid developments in information technologies, e-markets have also grown due to advantages of reach and cost effectiveness. E-auctions have additional benefits over traditional tendering systems such as competition among bidders arising from multiple rounds of bidding. E-auctions also have additional benefits over traditional auctions through greater competition arising from bidders participating from even remote/distant locations.

With a view to extending such benefits to producer owned institutions, NCDFI had launched the emarkets facility in June 2015 initially covering dairy commodities. Since then the transaction volumes have not only grown rapidly, but also expanded to cover cattle feed ingredients and other inputs such as chemicals and packaging materials.

I congratulate NCDFI on taking this emarket initiative to its current level and wish them all the best to continue running this successful initiative for the ultimate benefit of milk producers.

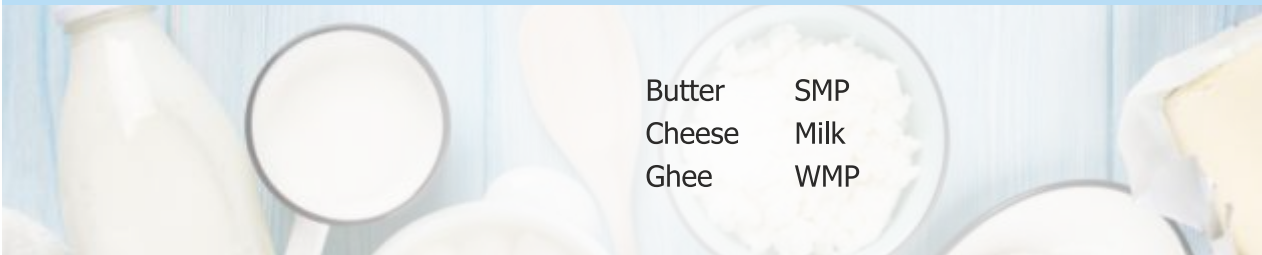

I would also urge all the producer owned institutions to take advantage of NCDFI eMarket to benefit from a national platform.

”
